To Whom it May Concern:

It is a pleasure to write this testimonial to the **Elite Realty Company and Margaret Pham and Lucas Nguyen.**

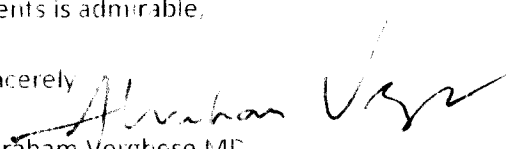

We purchased a new house from them in Menlo Park. We were attracted to the house by the wonderful details of finish and fittings, both inside and out. In particular the woodwork and molding and ceilings were quite spectacular, different from anything we have seen since.

asked as we were moving in, to have my study remodeled to have floor to ceiling shelves put on two walls, and not only did they accommodate me, but the shelves are exquisite and much admired by our visitors. The workers who come to do this and other work are invariably polite and follow a very high standard. We also had landscaping and fencework done through the builders and were very satisfied.

We have had a few minor callbacks and have found Elite Realty to be prompt and courteous in handling our needs and very attentive.

In short, if I were to build a house, I have no doubt that I would entrust to this company. Their professionalism, their commitment to excellence, the exquisite detail and the attention to servicing their clients is admirable.

Sincerely,

  
Abraham Verghese MD
